

Origins of the Industrial Revolution

Latin America

1. LA countries are colonies
2. Used for \$\$ - mercantilism
3. Rigid social hierarchy
4. Forced conversions
5. Colonies provide materials and labor

Revolutions

1. Haiti and L'Ouverture
2. Mexico and Hidalgo
3. South America and Bolivar
4. US and Monroe Doctrine
5. Europeans lost colonies forever

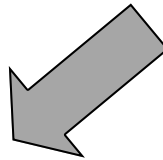

Back in Europe...

1. Europeans must make their own \$ and products
2. Will go through an Industrial Revolution
3. Industrial = making things (manufacturing)
4. Revolution = sudden change

Where?

1. Begins in England in early 1800s
2. England lost US as a colony first
3. Already went through Agricultural Revolution
4. More food = more people

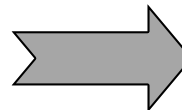

Why England?

1. England started Enclosure Movement
2. Make land and farms privately owned
3. People work harder for their own
4. Produce more and more food/resources

Why Else?

1. England has resources (coal, iron ore, timber)
2. England has international markets (\$\$)
3. England had the capital (\$\$) to spend
4. England had some industry already (textiles, iron)
5. England more liberal, take risks

**Industrial
REVOLUTION**
